

Ask My Bull biography

A musical chimera that combines the visceral energy of punk, the danceability of drum'n'bass and the intriguing nuance of jazz: Ask My Bull is delightfully hyperactive and cinematically epic ...

Beautiful chaos or a bittersweet play-fight? Ask My Bull birthed CREATURE, their first full-length album. It was released on the world in June 2019 and barely contains the energy of the band's journey between man and beast.

Always primed for festival season, Ask My Bull's has rocked many of the best, including Shambala, Boomtown, Beat-herder, Kendal Calling, Eden, Kelburn Garden Party, Nozstock and One Tribe/Audio Farm.

They provided the soundtrack for Vewn's viral video 'Cat City', which currently has almost 2 million views on YouTube. The collaboration later aired on Adult Swim, with the band's track 'Army of Swans' providing the soundtrack to Vewn's short 'Mask Dog'. The band even created a haunting live score for the play Oct.O.Pus ... who knows what they will be getting up to next ...

The band has recently completed their line up, adding a second sax player and are excited to write new material and gig in support of their album.
